PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer with experience in building and deploying web and mobile applications. Skilled in React.js, React Native, JavaScript, TypeScript, backend development, database management, and API integration. Proficient in developing responsive user interfaces, optimizing application performance, and delivering scalable solutions in agile environments. Passionate about creating efficient, maintainable applications that enhance user experience and business value.

INTERNSHIP EXPERIENCE

Data Science Intern

12/2023 – 01/2024

Neual Pvt. Ltd.

Bavdhan, Pune

- Developed a python-based data analysis system to process real-world weather datasets (temperature, humidity).
- Performed data cleaning, preprocessing, and statistical analysis to improve data quality.
- Created visual reports to identify seasonal patterns and trends.
- Implemented a linear regression model to predict temperature variations.

EDUCATION

Artificial Intelligence And Data Science Engineering (BE)

Balewadi, Pune

Genba Sopanrao Moze College of Engineering, Balewadi, Pune

HSC

Yamunanagar, Nigdi,
Pune

Modern Junior College, Yamunanagar, Nigdi, Pune
72.63%

SSC

Yamunanagar, Nigdi,
Pune

Modern High School, Yamunanagar, Nigdi, Pune
90.60%

TECHNICAL SKILLS

Frontend Development

HTML5, CSS3, JavaScript, Bootstrap, ReactJS, React Native, Typescript.

Backend Development

Core Java, OOP Principles, Exception Handling, Rest API

Database Management

MySQL, Relational Database Design, SQL Queries, Joins, Indexing

PROJECTS

City Corporation Complaint Portal (PCMC)

01/2026 – 02/2026

- Developed a responsive web-based City Complaint Management Portal enabling citizens to report civic issues efficiently.
- Implemented dynamic single-page navigation using JavaScript .
- Designed and Flexbox/Grid, ensuring mobile responsiveness.
- Integrated image upload with live preview functionality using JavaScript and DOM manipulation.

Prevention of Distributed Denial of Service (DDoS) Attacks

12/2024 – 01/2025

- Designed and implemented a network security mechanism to detect and mitigate DDoS attacks.
- Analyzed network packets to identify abnormal traffic patterns and malicious behavior.
- Implemented rate-limiting and IP-blocking techniques to prevent service disruption.
- Tested system performance under simulated attack conditions using Wireshark.
